

Visor acts as a middleman between your pedals and your PC and provides awesome new features!

*Fine tune your setup
with easy deadzone and
real-time feedback*

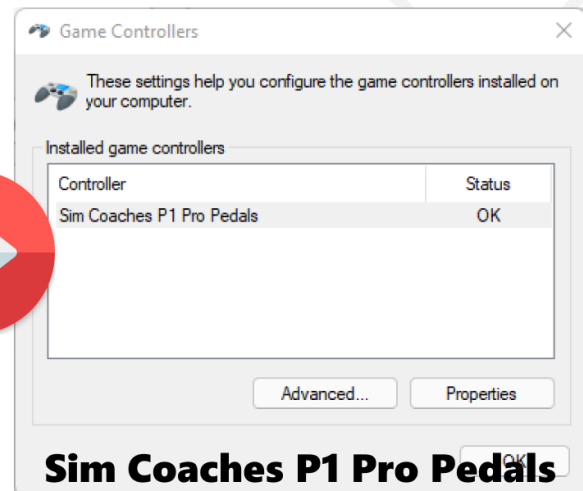

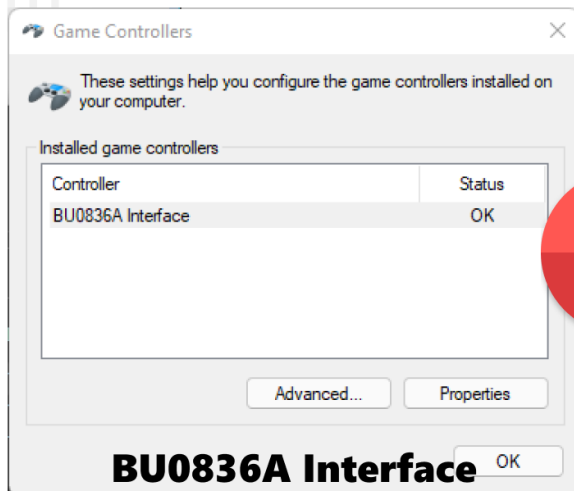

*Add input curves
to each pedal*

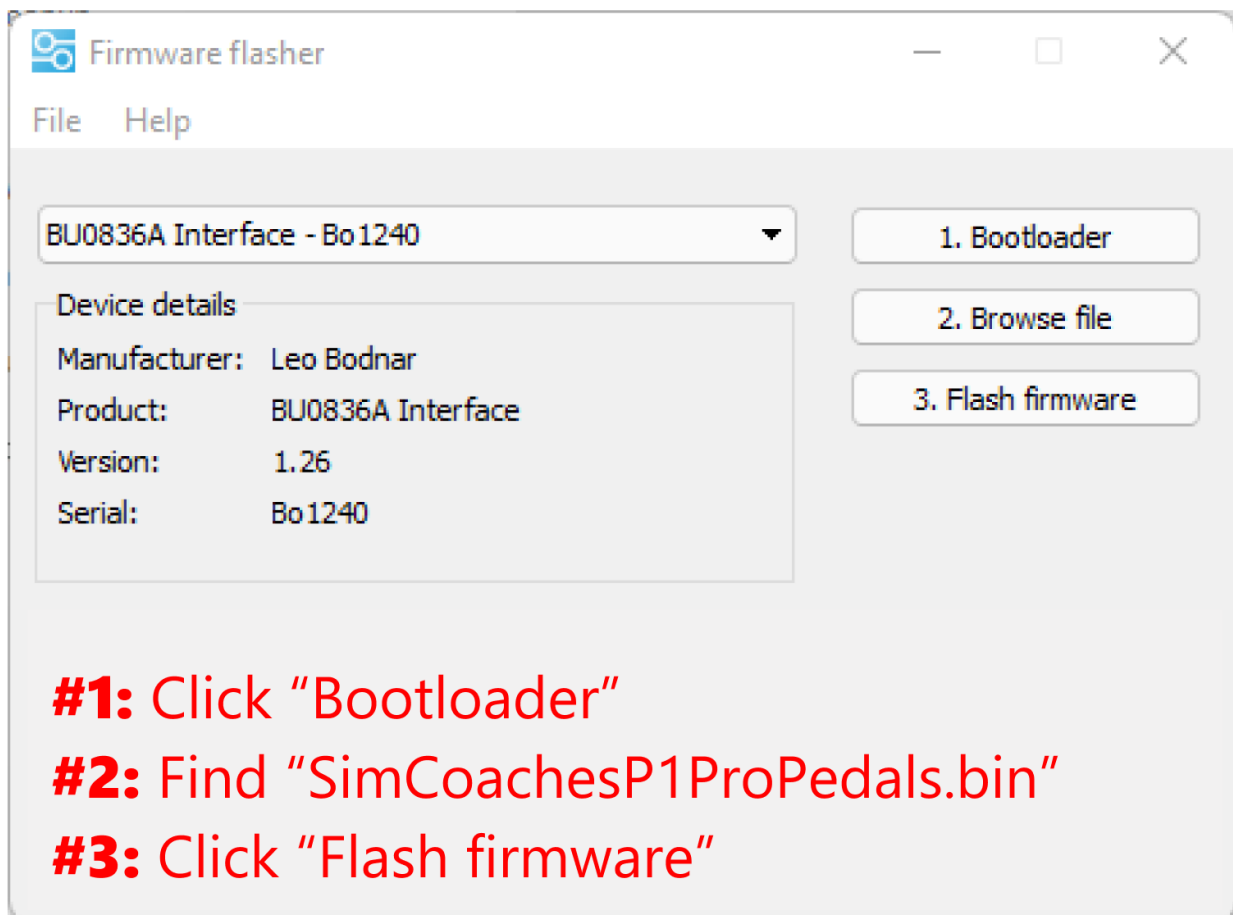

Do your pedals show up as BU0836 interface?
You will need to update their firmware.

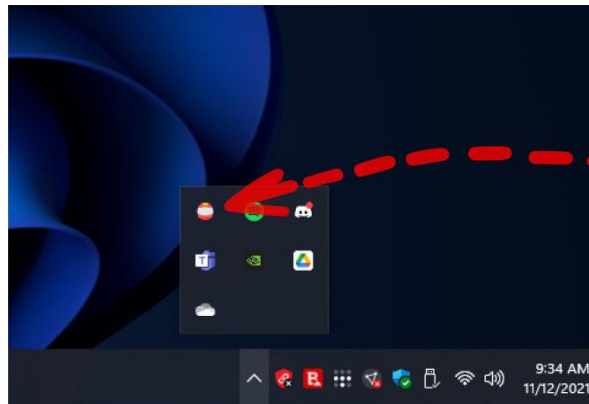

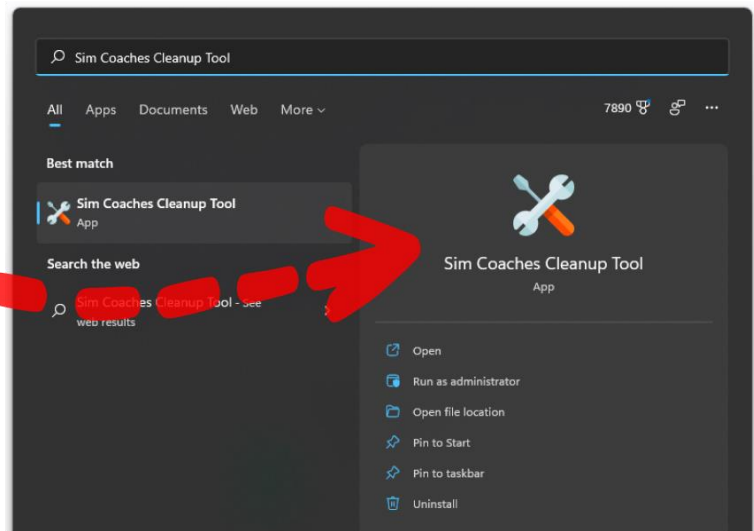

Use the Leo Bodnar HID Flash Tool to upgrade them:

Because this software relies on System Driver code
It's a good idea to restart your PC after installation

*You can also run the
cleanup tool to remove
our old stuff.*

*Visor will appear
on your taskbar
like this*
